

# GROW A CRYSTAL GARDEN

## Materials:

¼ cup water  
¼ cup laundry bluing  
¼ cup table salt  
1 T. ammonia  
charcoal briquettes  
shallow dish, such as a pie tin  
mixing bowl  
spoon  
food coloring

Put several charcoal briquettes in a shallow dish.

Carefully mix the water, laundry bluing, salt, and ammonia together.

Pour this mixture over the charcoal. The charcoal must stick up out of the liquid.

Put a few drops of food coloring on different places of the briquettes.

Soon crystals will begin to form and grow. Have fun!!
